

GTC Wealth Accumulator Fund of Funds

Minimum Disclosure Document

31 May 2016

Investment mandate and objective

The equity based portfolio incorporates value and core equity investment managers within a multi-manager solution that aims to outperform the FTSE/JSE Shareholders Weighted Index (SWIX) over a three year period. The value bias implies the use of qualitative and quantitative techniques to identify and invest into good quality companies trading at discounted prices. This combination of investment managers integrates risk management strategies to provide consistent returns with reduced volatility.

Investment features: Defensive equity strategy
Down-weighted resource sector exposure (SWIX benchmark)
Manager allocations based on risk adjusted investment strategy

Risk Profile of the Fund
High Risk

Performance (%)

	1 Year	3 Years*	5 Years*	Since Inception
GTC Wealth Accumulator FoF Class A'	0.03	6.42	7.57	9.48
GTC Wealth Accumulator FoF Class B'	-0.28	6.46	7.80	9.79
Benchmark - FTSE/JSE SWIX ²	4.57	12.06	13.91	14.86

¹Stated performance is after fees have been deducted

²Annualised

³Lump sum investment performances quoted.

⁴Income distributions not included in the performance calculation.

⁵Performance is calculated for the portfolio; individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

Performance history (%)

Year*	Highest annual return (%)		Lowest Annual Returns (%)	
	Portfolio: Class B	FTSE/SWIX	Portfolio: Class B	FTSE/SWIX
2016	6.67	8.20	-2.93	-2.43
2015	6.04	7.15	-3.23	-4.98
2014	3.94	4.78	-3.35	-3.46
2013	5.94	6.58	-4.61	-4.12
2012	4.39	4.40	-3.71	-3.24
2011	5.98	7.54	-3.44	-3.44
2010	7.75	8.65	-3.48	-4.56

*2016 return reflects the highest return achieved from January to the current month

Total Investment Charges

as at 31 December 2015

Class B:

Total Expense Ratio (TER)	3.11%
Weighted TER portion of underlying	3.11%
Performance Fees	0.00%
Transaction Costs (TC)	0.00%
Total Investment Charges (TIC)	3.11%

TER: expenses relating to the administration of the Financial Product. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not be necessarily an accurate indication of future TERs.

TC: Costs relating to the buying and selling of the assets underlying the Financial Product.

TIC: Transaction costs are a necessary cost in administering the Financial Product returns. It should be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Disclaimer

This is a minimum disclosure document. Collective Investment Schemes are generally medium to long term investments. The value of participatory interests may go down as well as up. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CIS's are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the manager. The manager has a right to close portfolios to new investors in order to manage them more efficiently in accordance with their mandates. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio as well as that of the individual investor. Recurring investment or lump sum investment performances are quoted. Income distributions are included in the calculations. Performance numbers and graphs are sourced from GTC. NAV to NAV figures have been used. Performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The investment performance is for illustrative purposes only. The investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the actual amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. One can also obtain additional information on GTC products on the website and all price related queries or information is readily available on request. Fund of funds are portfolios that invest in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds. The daily cut off time is 14:00 for trades and the valuation point is 17:00. Prices are published on Finswitch by 10:00 daily. GTC Management Company (RF) (Pty) Ltd is registered as a Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a member of ASISA.
