updated quarterly

Quarterly Commentary

The third quarter was plagued by deeper economic uncertainty which persisted the risk-off investment environment as the world battled to curb rising inflation. Global developed equity markets retracted some -6.19% over the quarter and -25.42% for the year in USD terms, while emerging equity markets experienced a -11.57% and a -27.16% sell-off over the same periods in USD terms.

Dollar strength driven largely by negative global investment sentiment pushed the USD/ZAR exchange rate to R18.1 at the end of September, up 9.6% for the quarter.
