Quarterly Commentary

Q4 2022 marked the best performing quarter for both the developed and emerging world equity markets as the remaining quarters all earned negative base currency returns amid the challenging global backdrop. Considerable market volatility and uncertainty have endured with subdued global trade expectations and global recessionary fears. Increasingly restrictive monetary policies from global central banks, given their concerns around longer lasting inflation had kept markets in a tailspin for most of the year.

The global developed equity markets earned +9.77% over the quarter and -18.14% for the year in USD terms, while emerging equity markets earned +9.70% over the quarter and -20.09% over the year in USD terms.
