

As of 31/12/2023

Rolling returns (%)

Time Period: Since Common Inception (01/09/2015) to 31/12/2023

Rolling Window: 3 Years 1 Month shift

Investment mandate and objectives

This is a prudential fund that invests in other funds to provide investors with an opportunity to hold a wide range of underlying asset classes within the ethical parameters of Shari'ah governed investments.

Please note that none of the portfolios described above offer guaranteed investment returns and the member assumes the investment risk. The actual investment returns, positive or negative, are passed onto the member.

- Features:**
- Regulation 28 compliant
 - Shari'ah compliant
 - Capital growth
 - Capital preservation
 - Multi asset class
 - Local and international exposure

Fund facts:

- Multi manager:** GTC
- Benchmark:** CPI + 3% over 5 year rolling periods
- Risk profile:** Moderate risk

Longest history cumulative performance (%)

Time Period: Since Common Inception (01/09/2015) to 31/12/2023

Calendar year returns (%)

As of Date: 31/12/2023

Performance (%)

	7 Yr*	5 Yr*	3 Yr*	1 Yr
GTC Shari'ah	7.74	9.46	10.74	9.58
CPI+3%	8.15	8.21	9.16	8.53

*Annualised
CPI is lagged by 1 month.

Returns are gross of all fees except for transaction, custody, and underlying manager performance fees. Please note that past performance is not a guide to future performance and individual investment returns may differ as a result of the selected client access point and cash flows.

Worst	Local Property -25.3	Local Property 1.9	Local Property -34.5	Global Bonds 2.5	Global Emerging Markets -15.2	Local Equity 7.9

Market summary

- Local equity markets ended the month up +2.9%, on the back of a 5.5% rally in the Financials sector and a +9.9% rally in the listed property sector. Industrials were slightly positive with +0.7% while the Resources sector contracted -1.3%.
- South African headline inflation (CPI) slowed to +5.5% in November 2023, down from +5.9% a month earlier.
- The local bond market (ALBI) delivered +1.5% for the month ahead of local cash (STEFI) at +0.7%.
- Developed market equities (+4.9%) outperformed emerging market equities (+3.9%) over the month in US dollar terms. The dollar weakened -2.9% relative to the rand, detracting from offshore assets' rand-based return.
- As market volatility and economic uncertainty remain elevated, GTC remains cautious in our portfolio positioning as we navigate through this market cycle.

Glossary

Standard deviation

- Is a measure that is used to quantify the amount of variation or dispersion of a set of data values around the mean value. This measure is commonly known as volatility and referenced as an explicit measure of risk.

Max drawdown

- Is the maximum loss from a peak to a trough of a portfolio before a new peak is attained. Maximum Drawdown is an indicator of downside risk over a specified time period.

Sharpe ratio

- Is a measure for calculating risk-adjusted return, and this ratio has become the industry standard for such calculations. The Sharpe ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. In other words, it measures how much excess return a portfolio has earned in relation to the level of risk it is exposure to. The higher the ratio the stronger the risk adjusted return.

Calmar ratio

- Is a measure for calculating risk-adjusted return. It is the average return earned per unit of capital loss risk taken in the form of maximum drawdown over a given period.
