Rolling Window: 3 Years 1 Month shift

Investment mandate and objectives

This is a higher risk portfolio which has a direct market focus as opposed to an inflation targeting strategy. The objective of this portfolio is to outperform a market benchmark portfolio, constructed using market indices, over rolling 10 year periods. This portfolio has been designed for capital growth through direct market exposure, accepting that there will be periods of greater volatility and market shocks from time to time. The portfolio has exposure to both local and offshore assets. The portfolio will have international equity exposure which offers diversification and a local currency hedge.

Features:

- Regulation 28 compliant
- Local and international exposure
- Multi-asset class exposure
- Maximum equity exposure

Fund facts:

Multi manager: GTC

As of 30/04/2024

Market summary

- Local equities ended the month up +2.9%. The Resource sector (+7.1%) continued its strong performance driven by Anglo American PLC (+32.6%). Financials rebounded in April ending the month up +2.7% driven by strong performance from banking counters such as Capitec (+11.1%) and Firststrand Ltd (+5.6%). The local Industrial sector is starting to see a rebound amid positive news out of China, specifically in the gaming sector affecting Tencent.
- SA property declined by -0.6% influenced by a pullback in heavyweight Nepi Rockcastle (-2.9%).
- The South African Chamber of Commerce and Industry (SACCI) business confidence index reached a high of 114.7 showing some stability in the sector despite challenging economic conditions. Headline inflation eased to 5.3% in March down from 5.6% in February, although it remained above the midpoint of the South African Reserve Bank's target range of 3% to 6%.
- Local bonds earned +1.4% as short term yields fell while local cash came in +0.7% for the month. The US Federal Reserve (Fed) maintained rates at a high of 5.5% for the sixth consecutive meeting. Concerns around a higher for longer interest rate environment globally has kept markets on uneven footing.
- Developed Market equities detracted -3.7% over the month, behind Emerging Market equities (+0.5%). China reported positive manufacturing and a GDP growth propelling its equity market up.

Glossary

Standard deviation

- Is a measure that is used to quantify the amount of variation or dispersion of a set of data values around the mean value. This measure is commonly known as volatility and referenced as an explicit measure of risk

Maximum drawdown

- Is the maximum loss from a peak to a trough of a portfolio before a new peak is attained. Maximum Drawdown is an indicator of downside risk over a specified time period.

Sharpe ratio

- Is a measure for calculating risk-adjusted return, and this ratio has become the industry standard for such calculations. The Sharpe ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. In other words, it measures how much excess return a portfolio has earned in relation to the level of risk it is exposure to. The higher the ratio the stronger the risk adjusted return.

Calmar ratio

- Is a measure for calculating risk-adjusted return. It is the average return earned per unit of capital loss risk taken in the form of maximum drawdown over a given period.
